

DHL EDI SOLUTIONS

DHL Express makes international shipping simple and efficient with fully-integrated business solutions.

OPTIMIZE YOUR GLOBAL SHIPPING PROCESSES.

Our Electronic Data Interchange (EDI) solution integrates DHL tracking, invoicing and remittance capabilities into your existing systems to handle millions of transactions. The highly advanced formats let you import relevant shipping information, as you need it, via electronic transfer – from shipment details to billing data. DHL EDI Solutions are designed to quickly onboard customers of all sizes with a variety of standardized formats to fit your specific needs. Industry standard messaging allows DHL to setup a new EDI integration for your company within a matter of days, instead of weeks.

Benefits

- Expedited onboarding
- Standardized formats
- Decreased paperwork
- Increased productivity
- Improved accuracy
- Reduced costs

DHL EDI SOLUTIONS

SUPPORT FOR ALL OF YOUR SHIPPING, TRACKING AND REPORTING NEEDS.

DHL EDI Solutions is ideal for companies who want shipment data directly intergraded into their servers, bypassing the manual and costly data entry process. Specifically created to assist with the monitoring of shipments, EDI automatically updates the status – as often as 18 times per day. A secure remittance alternative, it streamlines the accounts payable process by safely exchanging information and providing audit trails. With EDI, DHL also helped companies save approximately 25,000 reams of paper by removing the need to print invoices, waybills and manifests.

BENEFITS

- Booking - Schedule a DHL courier to pick-up your shipments
- Manifesting – A detailed list of your shipments' processing information
- Tracking – Visibility of your shipment during transit – from pickup through to delivery
- Invoicing – Receive waybill details, shipment information and itemized charges

Message Type	Message Standard	Message Name	Message Version
Booking	EDIFACT	IFTMBP	D99B
