

# DHL XML SERVICES

Integrated shipping information the way you need it,  
displayed how you want to see it.

## BUILD THE FULL STRENGTH OF DHL SHIPPING INTO YOUR APPLICATIONS.

Integrate DHL XML Services into your system for easy access to shipment and pickup booking, label generation, tracking services and more. Keep the look and feel of your site and use your own applications – there's no need for new hardware or software – and you can continue to use your own shipping and warehouse management systems while gaining access to our latest capabilities. DHL XML Services are excellent for eCommerce vendors, resellers and third-party logistics companies.

### Benefits

- Fully customized shipping solutions
- Accurate quotes for your customers
- Secure information exchange
- Greater control and cost effectiveness
- Seamless integration with your applications and websites

# DHL XML SERVICES

## SIMPLE TO IMPLEMENT AND INTEGRATE.

DHL XML Services are available in over 140 countries supporting the complete suite of DHL Time Definite and Day Definite services. You can confidently ship to and from any country with no limitations on origin or destination. This solution is ideal for shippers and software partners who want to make the most of their in-house applications using DHL services.

## AVAILABLE SERVICES

- **Capability** – Provides list of available services for given shipment criteria along with booking cut-off, pickup cut-off and transit times
- **Rate Quote** – Provides account-specific price quotes along with the breakdown of charges for the requested service combinations
- **Shipment Processing** – Validates shipment data and produces electronic Customs documents with waybill
- **Label Generation** – Generates DHL-compliant bar-coded waybill
- **Pickup Booking** – Schedule a DHL courier pickup
- **Tracking** – Obtain shipment details and event visibility filtered by waybill or reference number and account number

## DHL FLEXIBILITY

- Maintain existing hardware and software
- Utilize in-house shipping and warehouse management
- Control implementation timelines
- Employ standard XML-based secured platform to integrate with DHL
- Advise capabilities from internal shipping sites, shopping carts and eCommerce websites
- Receive DHL maintained and transmitted business rules
- Get customized technical support

### Next Step

Go live in four simple steps – get started by requesting the XML Services Toolkit at [www.dhl-usa.com/integration](http://www.dhl-usa.com/integration) and select “Start developing with DHL XML Services”
